

# MINI PROJECT

Title: A&S CHIT FUNDS

Team Members : Akash(063)  
Sai prasad(095)

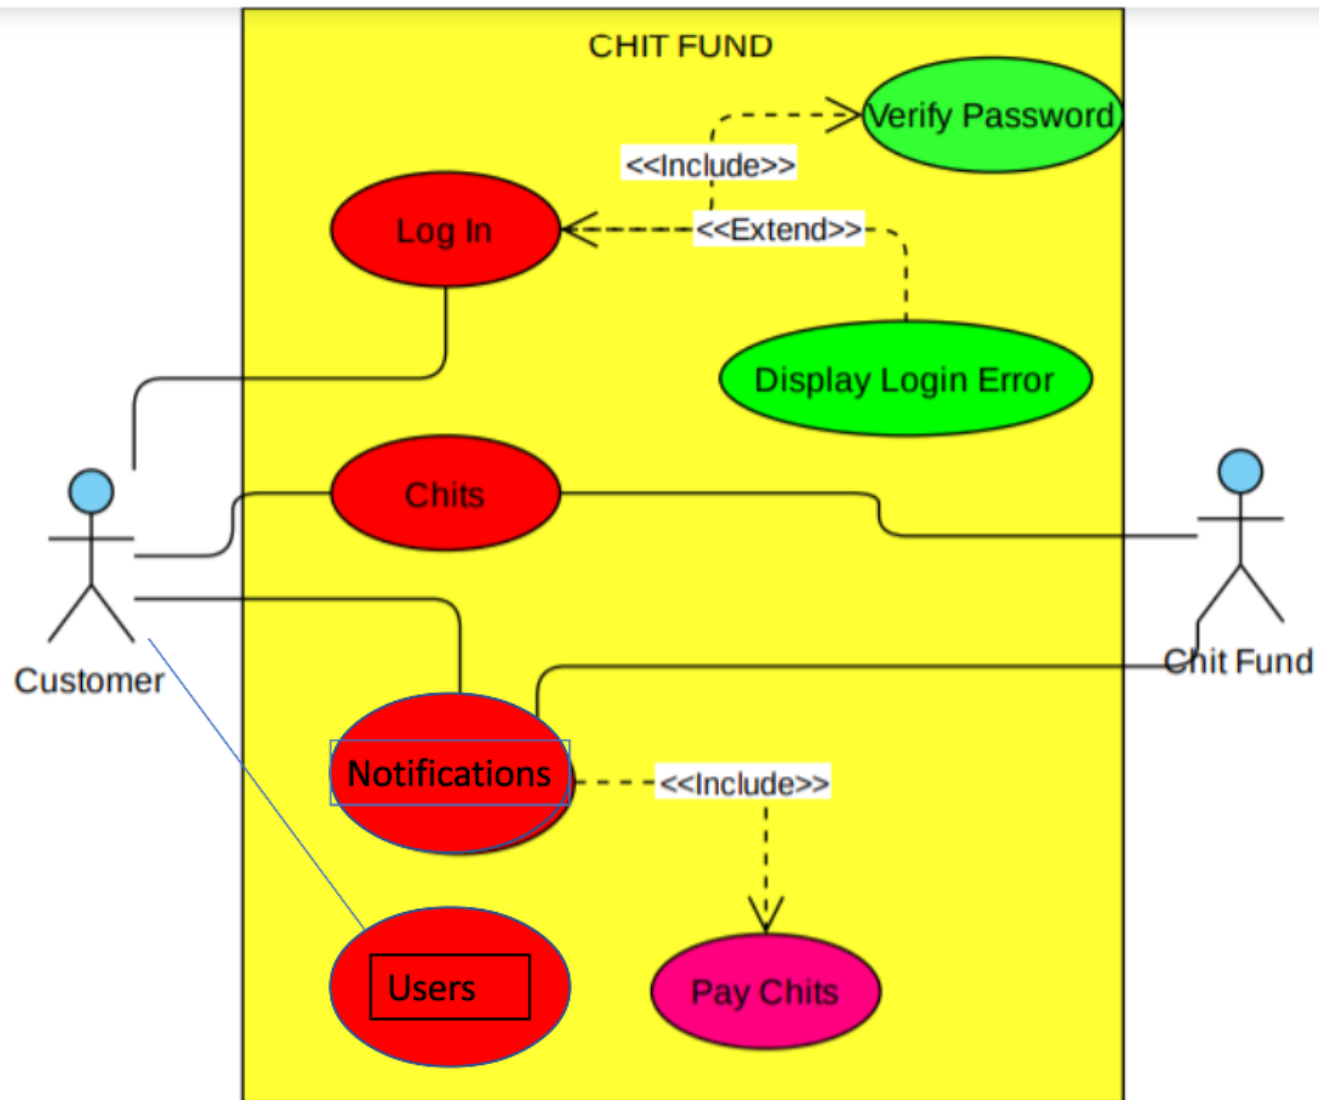

# ABSTRACT

## ► What is chit fund ?

A chit fund is a type of rotating savings and credit association system practiced in india.

## ► What actually we do ?

We gonna creat a chit fund software,which is a integrated solution to lead your chit fund business from our application.A user can creat an account and can make chits or join in chits that are exist,add members to chits, conduct bids, and view balances, profits all from one application. It can help you exactly cut time on planning reports.

## TECHNOLOGY

All computer software needs certain hardware components or other software resources to be present, in order for computers to be used efficiently. These prerequisites are known as System Requirements. Within this, we have two types – Software Requirements and Hardware Requirements.

### SOFTWARE REQUIREMENTS

Software Requirements deal with defining the software resource requirements and prerequisites that need to be installed on a computer to provide optimal functioning of an application. These preconditions are generally not included in the software installation package and need to be installed separately.

In order to use CODIAC, one should have the following:

**Operating System:** Windows 7 and above

**C Compiler:** GNU Compiler Collection (GCC)

**Editor:** VS CODE

### HARDWARE REQUIREMENTS

Hardware requirements refer to the common set requirements defined by any operating system or software application and are usually the physical computer resources. In this, we look into the architecture, processing power, memory, secondary memory, display adapter and peripherals.

In order to use this project, one should have the following:

**Processor:** Intel Pentium processor and above

**Memory:** 4 GB RAM and above

```

PS C:\Users\saipr\OneDrive\Desktop\c lang\MP> cd "c:\Users\saipr\OneDrive\Desktop\c lang\MP\" ; if ($?) { gcc mp.c -o mp } ;
if ($?) { .\mp }

**A&S CHIT FUND APP**

1.Login
2.Sign up
Enter your option:1
Enter username:prabhas
Enter Password:prabhas123
*****
1.Chits
2.Users
3.paychits
4:exit
Enter your option in main menu:[]

```

```

<-----STOP----->
A.join
B.create
C.chit_info
Z.Else go to Main menu
Enter your option:8
Enter the name of Chit:Rajasthan
Enter the no.of chit members:5
Enter the Chit amount:200000

Sucessfully the chit is created
*****
1.Chits
2.Users
3.paychits
4:exit
Enter your option in main menu:1
These are your chits joined till now:
<-----START----->
Telangana
India
Maharashtra
vasavian
Rajasthan

```

All Remaining SS are in document in a correct order

# CONCLUSION AND FUTURE WORK

- ▶ To conclude, this application is useful not only for educational institution but
- ▶ Also for any other organization who are keen to utilize this kind of application. It can be operated very easily.
- ▶ Future work is to we develop the application in PHP Or HTML to make the real payment, make this console application as a web application.
- ▶

THANK YOU
